

K109TC

TC TO DC CURRENT/VOLTAGE ISOLATOR/CONVERTER (WITH TRIP ALARM)

K109TC is a converter for Thermocouples TCs (J, K, E, N, S, R, B, T) and provides a mA/V standard output signal. Beside available there is a configurable threshold (relay) that may generate an alarm or may be utilized like a thermostat. It's completely configurable through dip switches/trimmer. A 3-way galvanic isolation among Power supply // input // output circuits assures the integrity of your datas.
